ePAF Automated Forms Created on 11/19/2012 12:34:00 PM

ePAF Automated Forms Automated Forms ePAF (electronic personnel action forms) is a module within PeopleSoft that allows for paperless employment transactions such as hiring an employee, job or pay changes, and end of employment The ePAF is initiated by a department initiator, and then it is electronically routed

Using the UML Action Language in Rational Software Architect

UML Action Language Background A UML action is the fundamental unit in a behavior specification, such as a state machine or activity model You can think about actions as something that "do something" - as the atomic pieces that together form the specification of what the behavior does

Examples of actions are • performing an operation call

Visual Modelling: past, present and future

facilities It's a testament to UML's adaptability that a modelling language for a completely new domain can be created in this way Because SysML is based on UML, it's easy for systems engineers familiar with UML to learn it, and for existing UML tool providers to support it The standard MOF foundation means that MOF tools can manipulate SysML
