### **Chapter 8 - Nonsterile Pharmaceutical Compounding ...**

The trick to using a spreadsheet for compound interest is using compounding periods instead of simply thinking in years. For monthly compounding, the periodic interest rate is simply the annual rate divided by 12 because there are 12 months or "periods" during the year. For daily compounding, most organizations use 360 or 365.

### **Compounded Sterile Preparations Pharmacy Fact Sheet ...**

If you had \$10,000,000 in principle, the compounding difference would change from \$0.00004 to \$4. For most purposes the first formula way up there is more than sufficient (and probably the one I would actually use in all cases because the practical difference in compounding daily versus monthly just isn't significant).
