Fizzy Drinks There is a unique product on the market known as Fizzies, which enables you to make your own carbonated beverage by dropping a tablet into water. The ensuing chemical reaction produces carbon dioxide gas, which causes the drink to be carbonated, producing the "fizz". The same reaction occurs in Alka-Seltzer antacid tablets,

## **Fizzy Drinks - users.wfu.edu**

This Activity is suitable for a high school chemistry or introductory college chemistry lab. It shows a very practical use of stoichiometry--that of making a carbonated drink similar to the popular Fizzies tablets that are added to water. The ingredients used are unsweetened powdered drink mix, aspartame sweetener (or sugar), citric acid, and baking soda.
