### **Green Infrastructure: Green Roofs and Walls | asla.org**

The green living wall was developed as an extreme sloped green roof. After key design changes, GLTI's patented technology made it possible to grow plants from zero to 90 degrees. Patented green living walls are available as wall-mounted or free-standing systems utilizing the Vertical Cultivation System® that GLTI pioneered and perfected. Unlike other systems made of bags, plastic, and felt, the green living wall is made from aluminum and stainless steel, which is preferred by LEED.
