Health and safety is an important consideration on any construction project. Not just to keep your workforce safe (although, this is the most important reason for health and safety), but also to comply with the law. Of course, health and safety regulations apply to every industry, not only construction.

Construction is a line of work that has a lot of risks to the health and safety of others. To prevent any tragedies from happening a plan must be in place to keep everyone safe.

That is why a construction health and safety plan is a mandatory thing to have before a construction project takes place.
