The Logistics And Supply Chain
*Logistics typically refers to activities that occur within the boundaries of a single organization and Supply Chain refers to networks of companies that work together and coordinate their actions to deliver a product to market.

What is Logistics and Supply Chain Management?
Logistics and supply chain aren't the same things. Logistics is the management of the movement of goods whereas supply chain management covers the many other areas we're discussing here.

Logistics and Supply Chain Management
The supply chain is experiencing a rather severe labour deficit - and it doesn't look like it's about to recover any time soon. In fact, according to The World Bank, the global problem is going either to remain the same, or in the worst-case scenario, deteriorate even further over the next five years.

Logistics & Supply Chain
